

electrohydraulics for power plants

- turbines regulation
- eco-generators: sun
wind
sea

high-performance
proportional valves with
digital drivers & unique
PC software control

full & consistent line
of servoproportionals
with integral drivers
and controllers

new digital electronics
specifically designed
for motion & force
axis control

digital servoactuators
ready to use
after piping to
the hydraulic source

Atos digital electrohydraulics
is successfully operating
in thousands applications
worldwide with full reliability
